RE: Draft Press Materials

Enclosed for your review are draft press materials on the EPA's SAB review. In addition to the enclosures, we plan on including a listing (with brief summary) of comments from the public docket that are critical of the risk assessment and the policy guide. Biographies of the scientists being made available to the media will also be included in the press kits.

As plans call for the first wave of distribution to occur on Friday a.m., your comments tomorrow would be appreciated.

Thank you in advance.
